Bachelor in computer science

About Me

I'm a person who can do different things and work well with others. I've had jobs like serving at a beach cafe and helping fix cars. I also handled bringing in stuff from Turkey, showing I can organize things well. Now, I'm learning web development, aiming to get really good at it. I've done well in my past jobs, and my plan is to use my new web skills to work on cool projects in the tech world.

Work Experience

Jan 2023- Present
Goods Importer I Turkey

Goods Importer

ensuring smooth logistics and timely deliveries. Coordinated with international suppliers, handled customs documentation, and optimized shipping processes. Demonstrated proficiency in supply chain management and a keen attention to detail, contributing to the successful importation of quality goods for the business.

2022
Mechanic Shop I Rafraf

Mechanic Assistant

supporting daily operations in vehicle maintenance. Aided in diagnostics, performed routine inspections, and assisted with repairs. Developed practical skills in troubleshooting and hands-on tasks, contributing to the efficient functioning of the automotive workshop.

Summer 2019-Summer 2023
Beach Cafe Server I Rafraf Beach

Cafe Server

provided exceptional customer service with a friendly demeanor. Efficiently took orders, delivered food and beverages, and ensured a positive dining experience for patrons. Demonstrated multitasking abilities and adaptability in a fast-paced beachside environment, contributing to the overall satisfaction of guests.
